Definitions of infiltration. As part of a disease process, infiltration is sometimes used to define the invasion of cancer cells into the underlying matrix or the blood vessels. Similarly, the term may describe the deposition of amyloid protein. During leukocyte extravasation, white blood cells move in response to cytokines from within the blood, into the diseased or infected tissues, usually ...

(Brunner & Suddarth 1986 p 66) This definition suggests that the nurse supervises care and plays a rather passive role with the family and no active role with children. It identifies the opportunity for families to be involved in the care of the hospitalised child and seems to recognise the importance of addressing the psychological needs of the child with regard to promoting normality of the ...
